Abstract (en)

[origin: WO2022058224A1] The invention relates to a cooking appliance device (12a-e), in particular a hob device, having at least one induction heating unit (14a-e) which has a first coil element (16a-e) and at least one second coil element (18a-e) which is arranged so as to at least partially overlap with the first coil element (16a-e), having at least one power unit (20a-e) for supplying electrical power to the induction heating unit (14a-e) and having at least one control unit (22a-e) which is provided to operate, by means of the power unit (20a-e), the first coil element (16a-e) alone in a first operating state and the first coil element (16a-e) and the second coil element (18a-e) together in a second operating state.
