Abstract (en)  
An attachment assembly is disclosed comprising an attachment plate (14) that has one or more attachment apertures (48) and a connecting arrangement (10) that is connected to the attachment plate and is suitable for connection with an external component (2). The connecting arrangement (10) has a loading axis, along which axis (A<sub>Sw</sub>) load from the attachment plate and the external component is preferentially directed. The connection between the attachment plate (14) and the connecting arrangement (10) is configured such that the attachment plate (14) can pivot with respect to the connecting arrangement (10) about an attachment plate axis (A<sub>P</sub>) that is normal to the loading axis (A<sub>Sw</sub>).
