Abstract (en)  
A method for the making of a case (1) with at least one integrated holder (2) for one or more writing tools (S) and at least one paper notebook (3), said case (1) can be made by folding a die-cut sheet (10) adapted to form at least partially the cover (C) of said case (1), and which has a plurality of cover elements (101, 102, 103, 104) mutually separated therein by corresponding first folding lines (11, 12, 13) parallel to each other, where said sheet (10) is reversibly foldable along said first folding lines or folding lines (11, 12, 13) between a closed configuration and an open configuration for forming at least one front cover element (103), a back cover element (101) and a spine cover element (102), the method comprising at least the following steps of:- fastening said at least one holder (2) to said at least one die-cut sheet (10) at one of said front or back cover elements (103, 101);- fastening said at least one paper notebook (3), at one of said front or back cover elements (101, 103) different from said front or back cover element (101, 103) at which said holder (2) is placed,- folding said plurality of elements (101, 102, 103, 104) along said first folding lines (11, 12, 13) in said closed configuration, where, in said closed configuration, said at least one holder (2) and said at least one paper notebook (3) face each other and are interposed between said front cover element (103) and said back cover element (101).
