Abstract (en)
A hinge (2) for a roof window, the hinge (2) having a frame-mountable component (4) mountable to a frame (8) of a roof window, a sash-mountable component (6) mountable to a sash (12) of a roof window, wherein the frame-mountable component (4) and the sash-mountable component (6) are engageable with one another and are movable relative to one another when engaged. The frame-mountable component (4) comprises a channel (14), and wherein the sash-mountable component (6) comprises a guide arrangement (16), the guide arrangement (16) being configured to move through the channel (14) of the frame-mountable component (4) and to guide the relative movement between the frame-mountable component (4) and the sash-mountable component (6). At least part of the guide arrangement (16) is adjustable so that the guide arrangement (16) occupies more or less of the space of the channel (14) of the frame-mountable component (4).
