Abstract (en)  
[origin: WO2022064183A1] The present invention relates to methods of providing an infused tobacco composition comprising infusing a starting tobacco composition with volatilised components formed by heating a volatile component source, thereby retaining at least some volatile components in the starting tobacco composition. The invention also relates to infused tobacco compositions, as well as aerosol delivery systems and components for use in aerosol delivery systems, comprising the infused tobacco compositions.
