Abstract (en)
[origin: WO2022063793A1] There is provided a cartridge (10) for an aerosol-generating system. The cartridge comprises a housing (36) containing a sealed liquid reservoir (44), a heater assembly (14) within the housing, the heater assembly comprising a heating element (12) and a piercing element (34). The heater assembly is movable relative to the housing from a first position in which the piercing element is outside the sealed liquid reservoir to a second position in which the piercing element penetrates the liquid reservoir. The heater assembly comprises a sealing surface that forms a liquid tight seal with the housing or the liquid reservoir when the heater assembly is in the second position.
