Abstract (en)
[origin: WO2022063541A1] The invention relates to a device for frying and/or deep-frying items to be fried, the device comprising a vat, a heating element and an insert for receiving items to be fried, wherein the insert comprises a plurality of separating devices which are suitable and provided for cooking a plurality of pieces of items to be fried separately from one another. The invention also relates to a corresponding insert and a method for frying and/or deep-frying items to be fried.
