Abstract (en)
[origin: WO2023094042A1] A packaging (100) for a cutting tool (150) includes a body (110) and one or more cover portions (120). The one or more cover portions (120) at least partially support the cutting tool (150) with the body (110). The packaging (100) is characterized in that the body (110) and the one or more cover portions (120) are integrally formed and made by fiber-based packaging. The one or more cover portion (120) are a first portion (130) and a second portion (140). The first portion (130) defines a wall profile (132) with the body (110) and the second portion (140) defines a curved profile (142) adjacent the body (110) to at least partially support the cutting tool (150) with the body (110).
