Abstract (en)

[origin: CA3194214A1] The invention relates to a method for producing polymer value papers (1) or polymer security papers (2) with at least one security feature (3), comprising a polymer substrate (4) made of at least one polymer, and to a polymer value paper (1) or polymer security paper (2) produced according to said method. The method has the following steps: - providing a polymer substrate (4) made of at least one polymer with a first substrate side (5) and a second substrate side (6), - providing a security element (7) comprising a transfer film (8) which comprises at least one security feature (3) and a releasable support film (9), - applying the transfer film (8) at least partly onto the first substrate side (5) and/or onto the second substrate side (6), - connecting the at least one security feature (3) to the first substrate side (5) and/or the second substrate side (6), and - removing the releasable support film (9).
