Abstract (en)

[origin: WO2022072287A1] A system (1100) and method for controlling a function of a mobile device (1107) over a secure wireless network is disclosed herein. The system (1100) comprises a mobile device (1107) for a vehicle (1000), a connected vehicle device (135) comprising on-vehicle data for the vehicle (1000), and an off vehicle source selected from a database, a cloud source, or a physical structure. The system (1100) is configured to access and combine off-vehicle content with on-vehicle data in order to enable, disable or manage at least one function of the mobile device (1107) over the secure wireless network.
