Abstract (en)

[origin: WO2022069790A1] The embodiments relate to a method and technical equipment, wherein the method comprises creating a control signal for controlling encoding of a bitstream (710); transmitting the control signal to more than one encoders (720); receiving a plurality of encoded media streams, which have been encoded according to the transmitted control signal (730); merging encoded input bitstreams into one output bitstream (740); and providing the output bitstream comprising the merged encoded input bitstreams for decoding (750).
