Abstract (en)
The present invention relates to a vacuum cleaner, and accessory for a vacuum cleaner and a vacuum cleaning system. A light source and a light outlet is positioned at the top of a spout of a handheld vacuum cleaner at a distance from the front surface of the spout. The emitted light can be used to make the dirt more visible when using in dark places when the appliance is used as handheld vacuum cleaner and this light can be used to couple this light into a light guide build into an accessory like crevice nozzle or brush nozzle.
