Abstract (en)
[origin: WO2022073928A1] The present disclosure relates to an aerosol generation device in which an aerosol generating substrate is heated to form an aerosol. More specifically, an aerosol generation device comprises: an aerosol generation chamber configured to receive and heat a substrate to generate aerosol, the aerosol generation chamber comprising at least a heating element; a cover which can be in a closed position covering an aperture in the device, and in an open position exposing said aperture; and a tray for receiving and holding the substrate.
