Abstract (en)
[origin: WO2022074013A1] An aerosol generating device (2) comprising: a heating chamber (6) arranged to receive an aerosol substrate (8), the heating chamber (6) operable to heat the aerosol substrate (8) to generate an aerosol; a first heating element (12) that is fixed relative to the heating chamber; and at least one second heating element (14) that is moveable relative to the heating chamber (6), wherein the at least one second heating element (14) is configured to be moved into contact with the aerosol substrate (8) in response to a first temperature being reached during a heating operation of the aerosol generating device (2).
