Abstract (en)
[origin: WO2022074311A1] The invention relates to packaging (E, E') for a medical device (D, 100'), the packaging comprising: - a first container (300, 300') receiving the medical device (D, 100'), - a second container (400, 400') receiving the first container (300, 300') and closed by a closure means (410, 410'), the packaging being characterised in that it comprises a frame (300, 600') for supporting the medical device (D), the support frame (300, 600') being preformed so as to have two walls which are arranged opposite each other and between which the medical device (D) is supported by means of at least one transversely arranged movable bearing stop (500, 61 T, 621').
