Abstract (en)
[origin: WO2022073642A1] The invention relates to a security element (20) for protecting valuable objects, having at least one translucent partial region. According to the invention, it is provided that the security element (20) has a multiple magnetic coding (38) which at least partially overlaps the translucent partial region (36), said magnetic coding consisting of two or more different magnetic colors (50, 52, 54, 60, 62, 64) and containing at least one transparent magnetic color (50, 52, 54) which at least partially overlaps the translucent partial region.
