Abstract (en)

[origin: WO2022090039A1] The invention relates to a pushbutton operating aid (10) having a fastening surface (12) for fastening the pushbutton operating aid (10) to a device (16) having a pushbutton (14) next to the pushbutton (14), wherein the fastening surface (12) at least partially surrounds the pushbutton (14) and a clearance (18) which is delimited on one side by a plunger (20), and having an operating component (22) which is connected to the plunger (20) and extends away from the plunger (20), wherein, by virtue of the operating component (22) being pushed down, the plunger (20) can be moved, such that it crosses the clearance (18), in the direction of a plane defined by the fastening surface (12).
