Abstract (en)

[origin: WO2022076424A1] In one non-limiting embodiment, there is provided a collateral device for use with one or more medicament devices including a collateral device housing and an opening extending there between, the opening configured to receive an adapter, at least a first sensor associated with the collateral device housing for detecting receipt of the portion of one or more medicament devices into the opening, and detecting actuation of an actuation mechanism of the medicament device; and an adapter receivable within the opening, the adapter comprising a receptacle for receiving and guiding a portion of a medicament device to a target surface.
