Abstract (en)

A method, executed by a terminal, and a corresponding mobile communication terminal are provided. The method includes the following steps: receiving a message containing text information, providing the received message via a messaging application executed by a processor of the terminal, extracting, when the message containing text information is received, at least one token from the text information, determining, from a plurality of different applications, at least one application corresponding to the extracted at least one token based on a correspondence information stored in the terminal, and processing, when executing the selected application, the at least one token as input to the determined application.
