Abstract (en)

[origin: WO2022081014A1] The invention provides an insect egg harvesting assembly (1) comprising: • - at least one insect container (4) comprising a sieve bottom (18) having a mesh size dimensioned for allowing insects to lay eggs at the opposite side of the sieve bottom and for preventing said insects to pass the sieve bottom and thus for preventing said insects to leave the insect container; • - an egg conveyor belt (2); • - an insect container lift system (3) for lifting said at least one insect container from said egg conveyor belt and for lowering said at least one insect container with said sieve bottom onto said egg conveyor belt.
