Abstract (en)
[origin: WO2022079244A1] The invention relates to a pouch suitable for a white snus, wherein the white snus comprises carrier material and nicotine without tobacco being present. The pouch comprises a fabric, and a surface of the fabric is at least partially coated with an odorizing composition comprising tobacco particles having an average size $\leq 30 \mu\text{m}$. A further subject of the invention is a method for manufacturing a pouch for white snus comprising the steps of providing fabric, providing an odorizing composition comprising tobacco particles having an average size $\leq 30 \mu\text{m}$, coating at least parts of a surface of the fabric with the odorizing composition, forming a pouch from the fabric and filling a white snus composition in the pouch. The odorizing composition is an ink, preferably comprising a liquid and a coloring agent, wherein the liquid is preferably selected from a group comprising water, propylene glycol and glycerin, propylene glycol and glycerin.
