Abstract (en)
[origin: WO2022084332A1] Disclosed herein is an aerosol provision system (1) comprising an aerosol provision device (2) comprising an outer face (3), wherein the outer face (3) comprises a first portion (5) and a second portion (6), the second portion 6 being recessed in a first direction with respect to the first portion (5), wherein the aerosol provision device (2) comprises a connecting portion (7) that connects the first portion (5) to the second portion (6) and defines an undercut (8) in a direction non-parallel to the first direction; and a removable member (4) configured to be removably attachable to the aerosol provision device (2) so as to cover at least a portion of the outer face (3), wherein the removable member (4) comprises at least one attachment element (9) configured to be removably receivable at least partially within the undercut (8) to restrict movement of the removable member (4) in a direction opposite to the first direction when the removable member is attached to the aerosol provision device (2).
