Abstract (en)

[origin: CN215858012U] The utility model relates to a fluid assembly for a sanitary fitting and the sanitary fitting. According to the utility model, in the fluid component (2) which can be assembled in the sanitary fitting (1), a hose (5) for connecting the discharge piece (3) to the valve (4) is configured to be long, so that the hose (5) extends out of an inner cavity (6), and the valve (4) is spatially connected with the discharge piece (3) through the inner cavity. This protruding section (45) of the hose (5) is fluidly connected to the valve (4) outside the interior (6). According to the fluid assembly and the sanitary fitting, the assembly of the sanitary fitting can be simplified.
