Abstract (en)
Disclosed is an outdoor portable gas stove (100), which includes a stove cover (10), a burner (20), a gas pipeline (30), an ignition device (40) and a flame-out protection device (500). The burner (20) is arranged in the stove cover (10), an annular gas passage (21) is formed in the burner (20), a gas outlet and combustion hole (23) is defined on an upper end face of the burner (20), and the gas outlet and combustion hole (23) is communicated with the annular gas passage (21). The ignition device (40) is arranged above the gas outlet and combustion hole (23) and is configured for igniting gas. The gas pipeline (30) is communicated with the annular gas passage (21), and a control valve (31) is arranged on the gas pipeline (30). The flame-out protection device (50) is arranged above the gas outlet and combustion hole (23) and connected with the gas pipeline (30). The technical proposal of the present application can realize an overall control of gas supply.
