Abstract (en)
Display cabinet for preserving food products, which comprises a support frame (2) comprising two crosspieces (21) fixed to two corresponding uprights (22), an insulating structure (3) fixed to the support frame (2) and comprising an insulating base panel (31) fixed to the two crosspieces (21) of the support frame (2) and an insulating back panel (32) fixed to the two uprights (22) of the support frame (2). The display cabinet also comprises a connection element (4) placed as a mechanical connection between the insulating base panel (31) and the insulating back panel (32), and such connection element (4) comprises a first hinge element (41) mechanically connected to the insulating base panel (31), and a second hinge element (42) mechanically connected to the insulating back panel (32) and rotatably connected to the first hinge element (41) in order to vary the mutual tilt between the insulating base panel (31) and the insulating back panel (32).
