Abstract (en)

[origin: WO2022084870A1] The present invention relates to a device (1) for access control. The device (1) comprises a first physical barrier (1) for delimiting an irradiation space (2) along a passage direction (A). The device further comprises an irradiation device (10) for subjecting a living being (3) in the irradiation space (2) to optical radiation in a wavelength range of between 200 and 230 nm, particularly preferably to optical radiation with a peak in a wavelength range of between 207 and 222 nm. The present invention also relates to a method for access control and to a use of said device.
