Abstract (en)

[origin: WO2022084928A1] The present invention relates to a moulding material comprising 60-98 wt% of a dry wood-based material; 2-40 wt % of a fibrillated cellulose material; and 0-10 wt% of an additive, as calculated on the total dry solids in the moulded material. The invention also relates to a method for preparing such moulding material, as well as a moulded product prepared from said moulding material, and use of the moulding material in a moulded product.
