Abstract (en)
[origin: WO2022082242A1] The invention relates to a furniture drive (4) for moving a furniture front part (3) movably mounted relative to a furniture body (2), in particular a furniture flap (3a, 3b), comprising - at least one support (5) for securing to the furniture body (2), - at least one actuator arm (6) which is pivotally mounted relative to the support (5) about a rotational axis (6a) between a closed position and a maximum open position, and - at least one adjustment device (9) which can be used to adjust the position of the maximum open position of the at least one actuator arm (6), wherein the at least one adjustment device (9) has at least one pivoting part (21) which can be moved relative to the at least one actuator arm (6) into at least two pivot positions, and the at least one pivoting part (21) spaces the at least one actuator arm (6) from at least one stop (22) arranged on the at least one support (5) to a different extent in the at least two pivot positions when the at least one actuator arm (6) is arranged in the maximum open position.
