Abstract (en)
[origin: WO2022082239A1] The invention relates to a furniture drive (4) for moving a furniture front part (3) relative to a furniture body (2), comprising a main part (9) to be secured to the furniture body (2) and an actuator arm (5) which is rotatably mounted on the main part (9) about at least one first rotational axis (7a) in the installed state. The actuator arm (5) has multiple levers (5a, 5b, 5c) which are connected together in an articulated manner; at least two of the levers (5a, 5b, 5c) of the actuator arm (5) are releasably connected to the main part (9) of the furniture drive (4); and at least the levers (5a, 5b, 5c) of the actuator arm (5) are symmetrical to an imaginary central plane (ME) of the actuator arm (5).
