Abstract (en)
[origin: WO2022082237A1] A furniture drive (4) for moving a movably mounted furniture part (3), comprising: - a support (9) for fastening to a furniture carcass (2), - at least one actuating arm (5) which is rotatable about at least one first axis of rotation (7a) and which serves for moving the movably mounted furniture part (3) relative to the support (9), - an interface (21) for fastening a synchronizing shaft (6), wherein the synchronizing shaft (6) allows a rotational movement of the at least one actuating arm (5) to be synchronized with a rotational movement of at least one actuating arm (5) of at least one further furniture drive (4), - wherein the interface (21) has at least one component (11) which is rotatable about a second axis of rotation (7b), wherein the second axis of rotation (7b) is arranged so as to be laterally offset from the first axis of rotation (7a) of the actuating arm (5), wherein the support (9) has at least one upper side (31) which, with the furniture drive (4) in a mounted state on the furniture carcass (2), faces an upper panel (2a) of the furniture carcass (2), wherein the first axis of rotation (7a) has a greater normal distance from the at least one upper side (31) than the second axis of rotation (7b).
