Abstract (en)

[origin: WO2022084154A1] The invention relates to a monitoring device (2) comprising an infrared sensor (3) and, furthermore, at least one sensor from barometric pressure, temperature, movement, sound level, relative humidity, ambient light, UV index, air quality and particulate sensors. The invention also relates to a system comprising such a device and remote processing means. The invention also relates to methods using such a device, particularly for monitoring a person, detecting the start of a fire or warning about a mechanical breakdown.
