Abstract (en)

[origin: WO2022090234A2] An aerosol generation device (1) comprises : - a rechargeable battery (3), - an atomizer (4) configured for heating an aerosol-forming precursor to generate an aerosol, - a controller (5) electrically coupled to the rechargeable battery (3) and controlling working of the atomizer (4) during a vaping session and charging of the rechargeable battery (3) during a charging session, and - a user interface (2) comprising a display (20) for displaying information relative to a vaping session or charging session and allowing a user to control this controller (5) and to choose a display brightness level of this display (20) by carrying out at least one dedicated interaction with a predefined part (21) of it (2).
