Abstract (en)  
[origin: WO2022093361A1] A pocketed spring assembly (12, 12a, 12b, 12d, 12e, 12') comprises a plurality of parallel strings of springs (26, 26a, 26b, 26c, 26d, 26e), each string joined to at least one adjacent string, each string comprising one piece of fabric folded into first and second opposed plies of fabric. Outer pockets (34, 34b, 98) are formed along each string by transverse seams (52, 114) joining the first and second plies. One pocketed spring and at least cushion pad (54, 54a, 54', 94, 94'') is positioned in each outer pocket (34, 34b, 98). The cushion pad (54, 54a, 54', 94, 94'') may be individually pocketed. An upper end (66) of each transverse seam (52, 114) may be below an upper surface (60) of the string (26, 26a, 26b, 26c, 26d, 26e) to partially separate adjacent outer pockets (34, 34b, 98) within a string.
