Abstract (en)

[origin: WO2022089886A1] The invention relates to a vehicle comprising an apron (1) having a main portion (2) extending in a transverse and vertical plane YZ of the vehicle and separating a passenger compartment and a front compartment, the apron (1) having an upper edge (3), the vehicle comprising an acoustic liner (5) in the form of a part having a main section (6) extending in a transverse and vertical plane YZ and having an upper flange (7), the main section (6) being clamped against the main portion (2) of the apron (1) on the passenger compartment side such that the upper flange (7) rests on the upper edge (3). According to the invention, the vehicle comprises a dashboard structure (12) attached above the upper flange (7) of the acoustic liner (5) resting on the upper edge (3) of the apron (1), the dashboard structure (12) comprising at least two rigid extensions (13) exerting pressure on the upper flange (7) to keep it clamped against the upper edge (3) of the apron (1).
