Abstract (en)

[origin: WO2022089925A1] The invention relates to an inflatable body (1) for drying and/or pressing a piece of textile (2), wherein the inflatable body (1) has at least one set of multiple chambers (4, 5) that are connected together by means of a movable connecting element (3), and wherein in each case two of the chambers (4, 5) are in contact via a positive-pressure element (6) such that an exchange of air and/or steam is possible between the chambers (4, 5), and the multiple chambers (4, 5) can be filled successively with air and/or steam, starting from a first chamber (4). The invention also relates to the use of the inflatable body (1) in a system (1, 7, 12, 13) for drying and/or pressing a piece of textile (2).
