Abstract (en)

A tamper-evidence for a product casing (103), comprising the product casing made from a packaging material; at least a first longitudinally shaped tearing zone (111, 204) comprising structures embossed in the packaging material, the at least one first longitudinally shaped tearing zone being located on a surface of the product casing and defining a delimitation of a lid area (109, 202) on the surface of the product casing; an opening strip (104, 200) made of a foil material, the opening strip being configured to adhere on the packaging material of substantially the entire lid area, to cover the at least one first longitudinally shaped tearing zone in order to seal it, and to produce a tearing of the packaging material corresponding to the at least one first longitudinally shaped tearing zone on the product casing and a removing from the product casing of packaging material of the lid area, as an effect of the opening strip being pulled away from the product casing.
