Abstract (en)
[origin: WO2022129597A1] An aerosol-generating article (1) comprising: a first element (10) comprising an aerosol-forming substrate (12); a susceptor element (20) arranged within the first element (10); and a hollow tubular element (100) disposed downstream of the first element (10). The hollow tubular element (100) comprises: a peripheral portion (110) defining a hollow inner region (120) of the hollow tubular element (100); and a support element (130) formed from a paper sheet and extending from a first point (131) at the peripheral portion (110) across the hollow inner region (120) to a second point (132) at the peripheral portion (110).
