Abstract (en)

[origin: WO2022096628A1] The invention relates to a printing machine (101) with a system for automatic error management for printing a repeating printed image on a running material web (109), comprising a control unit (105) and a camera (102) for carrying out an inspection of the printed material web (109) in order to detect printing errors, said camera being connected to the control unit (104). In order to allow printing errors (202) to be found again more easily on a printed material web (109), a web-marking unit (121) for applying web markings to the running material web (109) and a function switch for activating the web marking unit (121) are provided, a web marking being applied to the material web (109) by the web-marking unit (121) as soon as a printing error has been detected by the control unit (104) and the web marking unit (121) has been activated by the operator.
