Abstract (en)

[origin: WO2022096296A1] The invention relates to a transport device (1) for transporting containers (2), comprising at least one conveyor apparatus (100, 100') by means of which the containers (2) can be conveyed along a container transport section (BS) at an adjustable conveying rate, and a control cam (20). The invention is characterised in particular in that the control cam (20) is adjustable, specifically in such a way that the switching point (SP) of the at least one conveyor apparatus (100, 100') can be varied along the container transport section (BS) by means of the control cam (20).
