Abstract (en)
[origin: WO2022096526A1] The invention relates to a (spreader) lifting tool, a hoisting system comprising such a lifting tool and a hoisting method wherein use is made of such a lifting tool. The (spreader) lifting tool is configured to be suspended from a hoisting crane via one or more cables. The tool is provided with a stabilizing system comprising a movably supported mass and a mass actuator assembly that is configured for displacement of the mass in a horizontal plane in two non-parallel directions, e.g. an X-direction and an Y-direction.
