Abstract (en)

[origin: WO2022096832A1] The present disclosure relates to an assembly for a turbine of a turbomachine having a longitudinal axis, the assembly comprising: an exhaust cone (102) comprising an annular outer wall (104) for a stream of a primary airflow and an annular chamber (106) placed radially inside said annular outer wall (104), an exhaust casing (111) placed upstream of the exhaust cone (102) and connected thereto, and wherein one end of the annular outer wall (104) or one end of the annular chamber (106) is free to move relative to the exhaust cone (102) or to the exhaust casing.
