Abstract (en)

[origin: WO2022096333A1] One aspect of the invention relates to a domestic appliance (1) having a housing (2), having at least one hinge (5, 7), which is mounted on a front (6) of the housing (2), and having a door (4), which is mounted on the hinge (5, 7) and as a result is mounted pivotably relative to the housing (2), wherein the hinge (5, 7) has a bracket (15), which is fastened to an end face (8, 8a, 8b) of the front (6) with at least one fastening element (32, 33), wherein the bracket (15) is constructed symmetrically, so that it can be installed either on a left end face (8a) of the front (6) or on a right end face (8b) of the front (6), and in both installation situations the door (4) mounted on the bracket (15) is situated in the same position relative to the housing (2) in the height direction (y) and the width direction (x) of the domestic appliance (1) when in the closed state. Another aspect concerns a method.
