Abstract (en)
An inflatable air mattress comprising a top surface having a plurality of top surface connection points, a bottom surface having a plurality of bottom surface connection points, one or more side surfaces connecting the top surface to the bottom surface such that the top surface, bottom surface, and side surfaces form an airtight enclosure that comprises the exterior of the inflatable air mattress, and a plurality of connection strips, each connection strip attached to (i) one top surface connection point and two bottom surface connection points or (ii) two top surface connection points and one bottom surface connection point, and wherein at least some of the connection strips extend at a non-right angle between top surface connection points and bottom surface connection points to create a web-like internal structure.
