Abstract (en)

The invention relates to a male masturbation device comprising: a tube shaped housing for receiving a phallus; and a flexible tube member arranged within the tube shaped housing and defining an insertion opening for receiving the phallus, wherein the tube shaped housing is manipulable and a manipulation of the tube shaped housing causes a deformation of the flexible tube member thereby adjusting the diameter of the insertion opening. Furthermore, the invention also relates to an insertion opening regulation module for a male masturbation device.
