Abstract (en)

The invention relates to a control method and an associated packaging machine. A continuous cover film (3) made of a plastic material and a continuous base film (1) which is formed by at least a first layer (1.1) of cellulosic material and a second layer (1.2) made of a plastic material arranged on the first layer (1.1) and attached to said first layer (1.1) and comprising at least one cut (2) are supplied to sealing station of the machine, in a forward movement direction. Said cover film (3) is sealed to the second layer (1.2) of said base film (1) in the sealing station, and then a stretching of at least the part of the cover film (3) that is on the cut (2) of the base film (1) is caused.
