Abstract (en)
[origin: WO2022103613A1] A stand for an oral care implement, an oral care system which includes an oral care implement and a stand, and a method of separating a refill head from a handle using a stand. The stand may include a support feature for supporting the oral care implement in an upright orientation and an engagement feature for engaging the refill head while a user detaches the handle from the refill head. The support feature may be a depression or cavity formed in the stand, and the engagement feature may be one or more recesses or notches formed into a top edge of the stand.
