Abstract (en)

[origin: WO2022101007A1] The invention relates to a dishwasher (1), more particularly a domestic dishwasher, comprising: - at least one spraying device (20) which is actively driven by means of a drive apparatus (15) and intended for applying a washing liquor to items to be washed that can be placed in a washing container (2) of the dishwasher (1), the drive apparatus (15) comprising an electric motor (16) for actively driving the at least one spraying device (20) and a sensing unit (16A) for sensing a motor rotational speed (SIG) of the electric motor (16); and - a control device (25) which is designed to detect a blockage of the at least one spraying device (20) on the basis of the sensed motor rotational speed (SIG).
