Abstract (en)

[origin: TW202224981A] The invention relates to a levitation frame (7) for a vehicle (2) of a magnetic levitation railway (1) having a magnet unit (8) for the electromagnetic lateral guidance of the vehicle (2), and having a mechanical side guide (11). Furthermore, the invention relates to a vehicle (2) for a magnetic levitation railway (1) having at least one levitation framework (6), wherein the levitation framework (6) has at least one levitation frame (7). In addition, the invention relates to a rail arrangement (3) of a magnetic levitation railway (1) having a track (4) which is designed to at least partially enclose a levitation framework (6) of a vehicle (2). Finally, the invention relates to a magnetic levitation railway (1) having a vehicle (2) and a rail arrangement (3). For the levitation frame (7) it is proposed that the mechanical side guide (11) has a guide element (13) and at least one joint (14), wherein the guide element (13) is movably connected to the levitation frame (7) via the joint (14).
