Abstract (en)
[origin: WO2022101009A1] The invention relates to a handlebar (1) for a vehicle, comprising: - a bar (2) having an internal volume (20), the bar (2) extending longitudinally between two ends, of which at least one end, known as the "coupling end (21)", has a central axis (210) and is open so as to form a passage between the internal volume (20) and an external environment (24); - means (3) for closing off the coupling end (21) in a watertight manner.
