Abstract (en)
[origin: WO2022103271A1] The present invention concerns an inflatable salvage bag (1), for reducing fluid flow through a hole in the hull structure of a marine vessel or in a storage tank. The inflatable salvage bag (1) includes an inner bag (9), wherein the inner bag (9) is inflatable, a reinforcing bag (10), wherein the reinforcing bag (10) surrounds the inner bag (9) and is configured to be tear and puncture resistant and an outer bag (2), wherein the outer bag (2) surrounds the reinforcing bag (10). The inflatable salvage bag (1) further includes a valve (5), configured to connect the inner bag (9) with an external source of pressurized gas, in order to inflate the inflatable salvage bag (1).
